

TO THE COMMISSION:

There is an error in the filing for this proceeding from Anthony G. Angerame of California that I would like to correct for the record as part of your consideration.

The FCC Docket does NOT propose any restrictions by mode or activity on the segment 5250-5400Kc.

I support this open-ended, highly flexible protocol of allowing the "entire band.." for "RTTY, data, phone and image emission types."

(see 02-98, subpart III, section A, item 34, referenced as part of the FCC's Proposal in second C, item 38)
